# World Orange Production, 2017-2021

Table 1 and Figure 1 compare orange production, including tangerines, across eight countries and regions from 2017 through 2021, with all values reported in thousands of metric tons. The strongest trend is Brazil's sustained growth: production rose from 12,053 in 2017 to 18,998 in 2021, an increase of about 57.5%, and Brazil remained the largest producer in every year shown. India also increased overall from 8,776 to 10,806, or about 23.1%, while the European Union and Egypt recorded steady year-to-year gains. The United States shows the clearest downward trend, falling from 8.562 in 2017 to 4,500 in 2021, a decrease of about 47.4%, even though production briefly increased in 2019. China was more volatile, dropping sharply in 2018, recovering through 2020, and then declining again in 2021. Mexico and Spain remained in the lower production range and changed less dramatically across the five years. Taken together, the table provides precise values for comparison, while the line chart makes the contrasting patterns especially clear: Brazil widened its lead, India strengthened its position, and U.S. production moved in the opposite direction.

*Orange Production by Country/Region, 2017–2021 (Thousands of Metric Tons)*

| Country/Region | 2017 | 2018 | 2019 | 2020 | 2021 |
|---|---|---|---|---|---|
| Brazil | 12,053 | 13,165 | 15,482 | 16,982 | 18,998 |
| United States | 8,562 | 7,453 | 9,321 | 6,349 | 4,500 |
| China | 8,391 | 4,555 | 7,397 | 8,921 | 7,507 |
| European Union | 4,563 | 4,871 | 4,989 | 5,551 | 6,603 |
| India | 8,776 | 9,091 | 8,898 | 9,769 | 10,806 |
| Mexico | 4,898 | 3,777 | 2,992 | 3,878 | 4,003 |
| Spain | 3,325 | 2,671 | 2,906 | 3,287 | 3,422 |
| Egypt | 1,784 | 2,117 | 2,453 | 2,643 | 2,900 |
